## ABOUT ME

I am a front-end engineer with a passion for endless improvement. I am looking for opportunities to grow in a large company where I can both create innovative solutions and learn from experienced professionals.

## EDUCATION

### University

Collegium Da Vinci  
2023-present (on-campus)

## Hard Skills

- React
- JavaScript
- TypeScript
- Redux
- HTML
- CSS
- VITE
- Webpack
- GIT
- MongoDB
- Figma

English	Intermediate
Polish	Intermediate
Ukrainian	Native
Russian	Native

## Soft Skills

I am a team player, but I also enjoy working independently. I am focused on continuous self-learning and improving my skills.

## Pet Projects

### NoDistractionsYT | React, TypeScript, Vite, SASS

A Chrome extension that allows users to customize the YouTube interface and limit time spent on the platform. The project develops my skills in building browser extensions and optimizing user experience.

### Quiz App | React, TypeScript, Vite, SASS

An interactive application that enables users to solve quizzes. The project includes dynamic question management, answer handling, result storage, and API integration. It enhances my skills in TypeScript.

### Todo | React, Typescript, Vite, SASS

A simple CRUD task manager to improve my TypeScript skills.

### Discord checker | React, JavaScript, ExpressJS, Vite, SASS

A project using OAuth2 and the Discord API to allow users to view all their servers and Discord account statistics.

## Interests

My interests include exploring new technologies as well as designing, optimizing, and testing user interfaces. Additionally, I am passionate about backend development, where I focus on building efficient and scalable systems.
