Andrii Kaplan

+48510250281 | andrii.kaplan.work@gmail.com | github | portfolio | linkedin | Poznan, Poland

Summary

Confident working across the full stack — from Frontend to Backend. Experience configuring projects and building React applications (from useState to useMemo), with active involvement in collaborative team development. Skilled in optimizing website performance and delivering smooth user experiences.
Currently studying Information Technology at Collegium Da Vinci in Poznań, Poland (4th semester, expected graduation 2027).
Up to date with industry trends and quick to adopt new technologies and tools.
Seeking opportunities to grow within a consumer-focused company, contribute to robust solutions, and learn from in-depth, well-structured projects.

Skills

React, Nest.js, TypeScript, JavaScript, Redux, Three.js, Prisma, HTML, CSS, VITE, Webpack, GIT, MongoDB, Figma

Pet projects

Bank Application | React, TypeScript, Redux, Vite, Tailwind
Full-featured online banking application simulating real-world bank functionalities. The platform enables users to manage personal finances with features such money transfers, savings goals.

NoDistractionsYT | React, TypeScript, Vite, SASS
A Chrome extension that allows users to customize the YouTube interface and limit time spent on the platform. The project develops my skills in building browser extensions and optimizing user experience.

Quiz App | React, TypeScript, Vite, SASS
An interactive application that enables users to solve quizzes. The project includes dynamic question management, answer handling, result storage, and API integration. It enhances my skills in TypeScript.

Discord checker | React, JavaScript, ExpressJS, Vite, SASS
Application for viewing all their servers and discord account statistics. Project using OAuth2 and the Discord API.

Todo | React, Typescript, Vite, SASS
CRUD task manager

Solar-system | React, TypeScript, Three.JS, Vite, SASS
A 3D interactive recreation of our solar system built with Three.js, React, and TypeScript. Explore celestial bodies with realistic motion and visuals.

Education

Collegium Da Vinci | Poznań, Poland
